ACADEMIC MINOR PROJECT PRESENTATION

JOB CONNECT

Cloud-Native Recruitment Portal & Applicant Tracking System (ATS)

Presented by: Samanvaya Vats

Tech Stack: React 18 (Vite) | Node.js Express | MongoDB Atlas | Clerk Auth | Cloudinary | Vercel & Render

Project Motivation & Problem Statement

Current Recruitment Inefficiencies

Challenges with Legacy Portals

• Fragmented Hiring Channels: Candidates apply across fragmented job boards with zero feedback on review progress.

• Manual Application Tracking: Recruiters drown in spreadsheets, manual email filters, and unorganized resumes.

• Cloud Container File Losses: Traditional disk-based file uploads trigger severe ENOENT crash errors on stateless cloud platforms.

• Auth Vulnerabilities: Custom session tokens often lack modern MFA, OAuth federation, and secure token rotation.

The Job Connect Solution

Next-Generation ATS Architecture

• Unified Recruitment Ecosystem: Complete end-to-end recruitment suite for both job candidates and enterprise talent recruiters.

• Full-Lifecycle ATS Board: Real-time visual tracking from Applied -> Reviewing -> Shortlisted -> Interview -> Decision.

• Zero-Disk In-Memory File Engine: Seamless RAM buffer streaming to Cloudinary, completely eliminating disk ENOENT issues.

• Enterprise-Grade Clerk Security: Flawless SSO, OAuth authentication, JWT session validation, and auto-provisioning.

JOB CONNECT — MINOR PROJECT EVALUATION

System Architecture & 3-Tier Cloud Stack

Client Tier (Frontend)

Vercel Global Edge Network

- React 18 Single Page Application (Vite)
- Tailwind CSS with responsive mobile-first UI
- Clerk React Provider & Protected Routes
- Axios with Clerk JWT interceptors
- Lucide React Icons & modern modal workflows

Application Tier (REST API)

Render Cloud Container

- Node.js (ES Modules) & Express.js REST API
- Clerk Express Middleware session verification
- Multer Memory Storage (zero disk I/O)
- Cloudinary v2 API with Base64 fallback
- Permissive, secured CORS for Vercel clients

Data & Identity Tier

MongoDB Atlas & Clerk Identity

- MongoDB Atlas M0 Cloud Cluster (JSON docs)
- Mongoose Schemas for Users, Jobs & Apps
- Clerk Identity Provider (OAuth, SSO, JWT)
- Cloudinary Asset Cloud for Resumes & Avatars
- Distributed indexing on search & foreign keys

JOB CONNECT — MINOR PROJECT EVALUATION

Candidate Module: Discovery, Application & Status

Job Discovery & Smart Filters

Streamlined Job Search Experience

- Live title and keyword search across postings.
- Filter by Experience: Fresher, 1-3 Yrs, 2-4 Yrs.
- Filter by Job Type: Full-Time, Remote, Internship.
- Verified enterprise badges and transparent salary packages.
- Responsive, lightning-fast client pagination.

ATS Application Pipeline & CV Profile

Candidate Transparency & Growth Hub

- One-Click Application modal prefilling user details.
- Seamless PDF/Doc resume upload with instant Cloudinary validation.
- Real-time visual ATS status pills: Applied -> Reviewing -> Shortlisted -> Interview.
- Interactive CV Builder: Educational qualifications, GPA scores, and career history.
- Dynamic avatar photo uploads with instant live preview.

JOB CONNECT — MINOR PROJECT EVALUATION

Recruiter Dashboard & Full ATS Management

Job Vacancy Publishing & Control

Recruiter Control Center

- Create rich vacancy listings with experience level, location, and job type.
- Skills required tagging (React, Node, Express, MongoDB, Docker, etc.).
- Toggle job status between Active and Closed in real-time.
- Live applicant counter automatically synchronized per vacancy.
- Strict authorization: Only job authors can access candidate lists.

Applicant Evaluation & Stage Transitions

Standardized Talent Acquisition Workflow

- Deep Candidate Inspection: View degree, GPA, and work history.
- Inspect verified candidate contact info (Email, Phone number).
- Read customized candidate cover letters per role.
- Direct 1-click preview of candidate resumes via Cloud CDN.
- Advance candidates across ATS stages: Applied -> Reviewing -> Shortlisted -> Interview -> Decision.

JOB CONNECT — MINOR PROJECT EVALUATION

Security Architecture & Zero-Disk Cloud Storage

Clerk Authentication & Session Sync

Enterprise-Grade Identity Protection

• Modern Identity Federation: Out-of-the-box Google OAuth, GitHub, Email/Password, and MFA.

• Stateless JWT Verification: Express middleware cryptographically validates Clerk session tokens.

• Automatic Provisioning: First-time sign-ins auto-generate MongoDB User records without signup sync hurdles.

• Role-Based Guards: Client & server routes verify roles (job_seeker vs recruiter) before serving sensitive data.

Zero-Disk Memory Storage Engine

Eliminating Container File System Crashes

• Elimination of ENOENT: Replaced vulnerable disk storage with multer.memoryStorage(), keeping files strictly in RAM.

• Cloud-Native Stream: Directly converts RAM buffer into a Data URI and uploads to Cloudinary API over HTTPS.

• Automatic Resource Typing: Configured resource_type: 'auto' so PDF resumes and image avatars parse smoothly.

• Fail-Safe Database Fallback: If external CDN fails, stores Base64 Data URI into MongoDB so uploads never crash.

Database Schema Design (MongoDB Atlas)

User Model

Identity Entity

- _id: ObjectId (PK)
- clerkId: String (Unique, Indexed)
- email, userName, fullName
- role: Enum ['job_seeker', 'recruiter']
- phoneNumber, summary
- avatar: String (CDN URL)
- resume: String (CDN URL)

Job Vacancy Model

Posting Entity

- _id: ObjectId (PK)
- userId: Ref -> User (Recruiter)
- title, companyName, location
- jobType: Full-Time / Remote / Intern
- experienceRequired: Fresher / 1-3 Yrs
- salary: String range
- skillsRequired: Array of Strings
- status: 'Active' | 'Closed'

Application Model

ATS Workflow Entity

- _id: ObjectId (PK)
- jobId: Ref -> Job (Vacancy)
- userId: Ref -> User (Applicant)
- status: Enum [Applied, Reviewing, Shortlisted, Interview, Accepted, Rejected]
- qualification, experience: String
- coverLetter, resumeUrl
- notes: String (Internal notes)

JOB CONNECT — MINOR PROJECT EVALUATION

Live Production Deployment & Verification

Production Cloud Environments

Active Public Endpoints

- Live Frontend (Vercel): https://job-connect-omega-three.vercel.app/
- Global edge CDN distribution with SPA routing rewrites.
- Live Backend API (Render): https://job-connect-api-8w32.onrender.com/
- Linux container service with auto-monitoring & CORS enabled.
- MongoDB Atlas M0 Cluster: cluster0.opgt5ai.mongodb.net/jobconnect
- Multi-tenant cloud cluster with automated daily backups.

Live Verification Status

Operational Milestones Achieved

- Health Check Active: /api/health reports build v1.2.0-memory-storage & storage: memoryStorage.
- Cloudinary Connected: Environment credentials validated with live Cloudinary ping success.
- File Upload Verified: Live avatar & resume uploads returning HTTP 200 OK with secure Cloudinary asset URLs.
- Seeded Job Openings: 8 verified enterprise job vacancies populated (Razorpay, Microsoft, Swiggy, CRED, Stripe, Zomato).
- Cross-Origin Security: Configured CORS for vercel.app domains prevents unauthorized API spoofing.

JOB CONNECT — MINOR PROJECT EVALUATION

Technical Results & Key Metrics

100%	8+	6 Stages	<150ms
Cloud Native	**Seed Vacancies**	**ATS Lifecycle**	**API Response**
Stateless memory storage eliminating container disk failures	Live vacancies across Top Tech companies ready for testing	From Applied to Review, Shortlist, Interview, and Offer	Low-latency REST endpoints indexed on MongoDB Atlas

Key Engineering Highlights

- Modern Component Architecture: 10+ modular React pages with reusable Lucide icon badges and dynamic state management.
- Clerk Auth Migration: Successfully transitioned from legacy custom JWT cookies to Clerk enterprise authentication.
- Automated Seed Script: Fully automated Node script seeding realistic tech jobs with exact industry compensation and skills.
- Production Hardened: Complete error handling with descriptive fallback error messages surfaced directly in the frontend UI.

FINAL SUMMARY & ROADMAP

Future Roadmap & Project Conclusion

Future Enhancements

Next Generation Capabilities

• AI Resume Parsing (LLM): Auto-extract candidate skills and calculate match % scores against job requirements.

• Real-Time WebSocket Notifications: Instant live alerts when recruiters advance an applicant's ATS status.

• In-Platform Video Interviewing: WebRTC integration for direct, seamless interviews within the dashboard.

• Recruiter Analytics: Automated funnel graphs, time-to-hire statistics, and applicant demographic charts.

Conclusion & Academic Takeaways

Project Summary & Outcomes

• Comprehensive Project Scope: Built and deployed a production-ready ATS recruitment platform with high real-world utility.

• Mastery of Cloud Architectures: Gained hands-on expertise with distributed cloud services (Vercel, Render, Atlas, Clerk, Cloudinary).

• Solved Real Cloud Storage Obstacles: Mastered in-memory stream processing to conquer ephemeral cloud container limitations.

• Evaluation Ready: Codebase is fully documented, version-controlled, seeded with real data, and accessible live worldwide.
